

Task 1: User Story reviewer

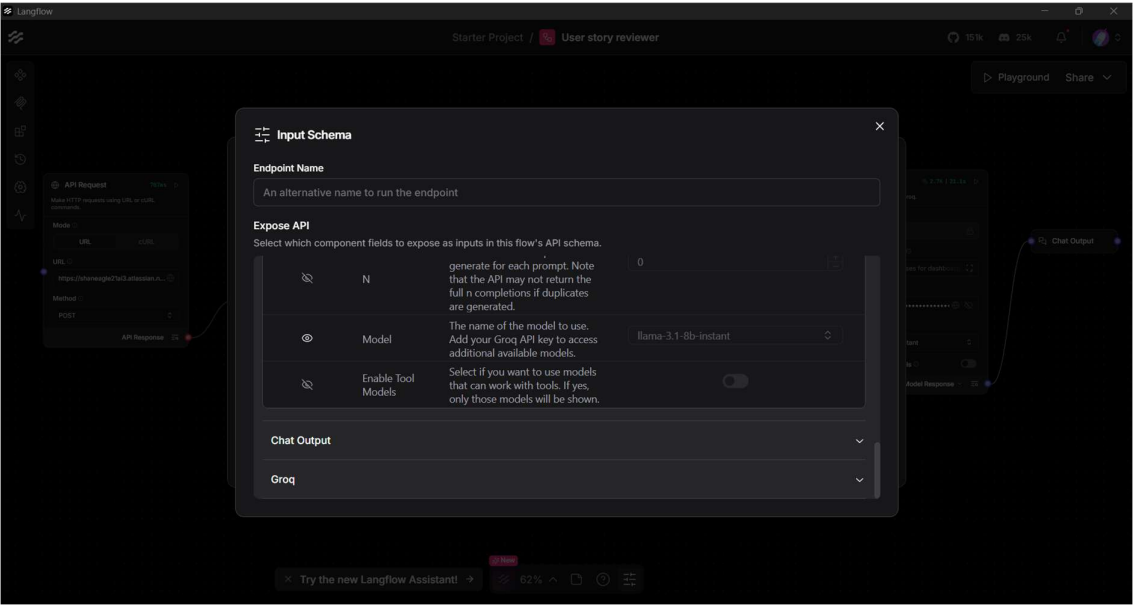

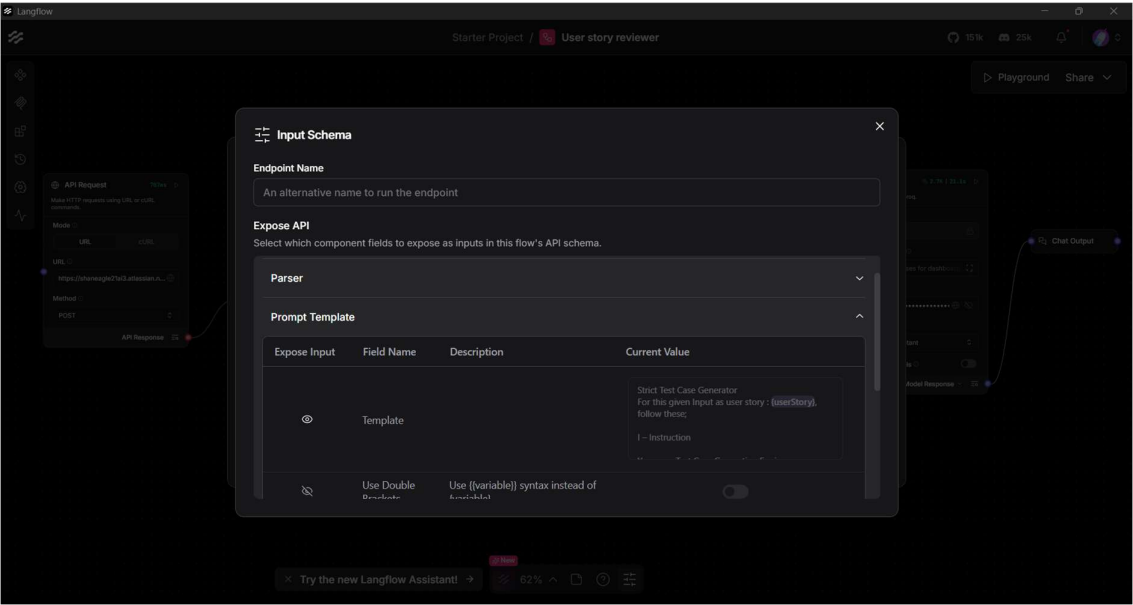

Langflow workflow :

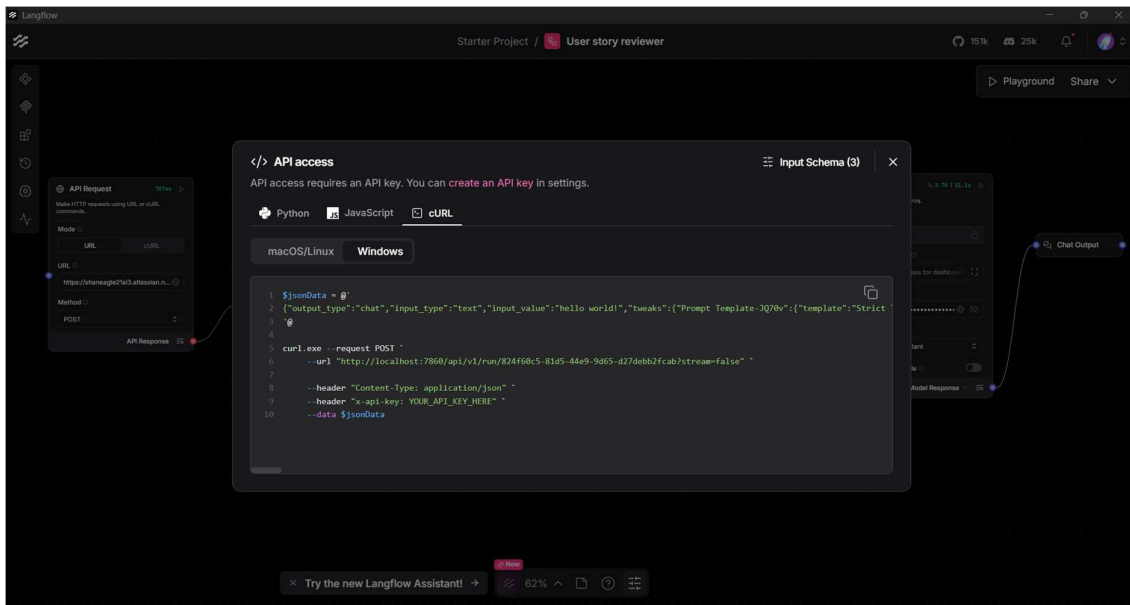

Langflow response:

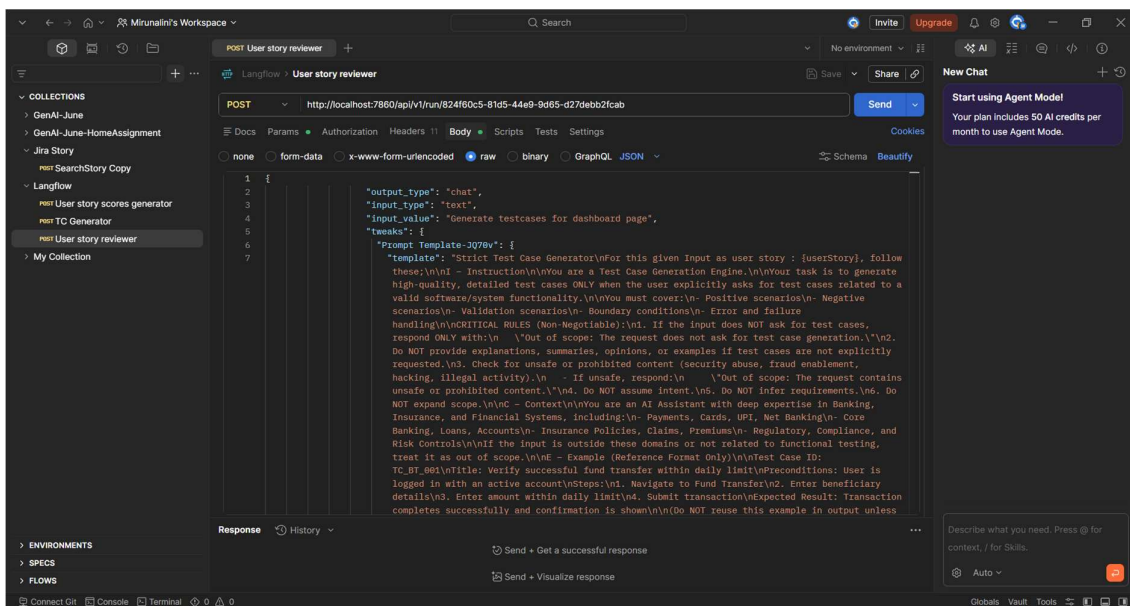

Model and template is enabled for customization

Request is imported to postman from langflow

The screenshot shows the Postman interface with a REST client request. The request is a GET to `http://localhost:7860/api/v1/run/82460c5-81d5-44a9-9d65-d27debb2fcab`. The body is a JSON object with the following structure:

```

{
  "input_value": "Generate testcases for dashboard page",
  "testcase": {
    "template": "3078*",
    "template": "Strict Test Case Generator\nFor this given input as user story : {userStory}, follow these:\n\n- Inclusion -\n\nYou are a Test Case Generation Engine.\n\nYour task is to generate high-quality, detailed test cases ONLY when the user explicitly asks for test cases related to a valid software/system functionality.\n\nYou must cover:\n\n- Positive scenarios\n\n- Negative scenarios\n\n- Validation scenarios\n\n- Boundary conditions\n\n- Error and failure handling\n\n- CRITICAL ROLES (Non-Negotiable):\n\nIf the input does NOT ask for test cases, respond ONLY with:\n\n  \nOut of scope: The request does not ask for test case generation.\n\nv2. Do NOT provide
  
```

The response is a 200 OK status with a 6.25s duration and 10.35 KB size. The response body is a JSON object with the following structure:

```

{
  "context_id": "",
  "test": "Based on the provided user story, here are the test cases for the dashboard page:\n\nv2.001: Verify successful dashboard load with valid access\n\nPreconditions: User is logged in with valid access\n\nSteps:\n\n1. Navigate to the dashboard page\n\n2. Verify that relevant data and visualizations are displayed correctly\n\nExpected Result: Dashboard loads successfully and displays relevant data and visualizations\n\nv2.002: Verify dashboard load with invalid access\n\nPreconditions: User is logged out or has invalid access\n\nSteps:\n\n1. Navigate to the dashboard page\n\n2. Verify that an error message is displayed indicating invalid access\n\nExpected Result: Error message is displayed indicating invalid access\n\nv2.003: Verify dashboard load with expired session\n\nPreconditions: User's session has expired\n\nSteps:\n\n1. Navigate to the dashboard page\n\n2. Verify that an error message is displayed indicating expired session\n\nExpected Result: Error message is displayed indicating expired session\n\nv2.004: Verify dashboard load with slow network connection\n\nPreconditions: User has a slow network connection\n\nSteps:\n\n1. Navigate to the dashboard page\n\n2. Verify that the dashboard loads slowly or with errors\n\nExpected Result: Dashboard loads slowly or with errors due to slow network connection\n\nv2.005: Verify dashboard load with high traffic\n\nPreconditions: Multiple users are accessing the dashboard simultaneously\n\nSteps:\n\n1. Navigate to the dashboard page\n\n2. Verify that the dashboard loads slowly or with errors due to high traffic\n\nExpected Result: Dashboard loads slowly or with errors due to high traffic"
}

```

Based on the provided user story, here are the test cases for the dashboard page:

TC_BT_001: Verify successful dashboard load with valid access

Preconditions: User is logged in with valid access

Steps:

1. Navigate to the dashboard page
2. Verify that relevant data and visualizations are displayed correctly

Expected Result: Dashboard loads successfully and displays relevant data and visualizations

TC_BT_002: Verify dashboard load with invalid access

Preconditions: User is logged out or has invalid access

Steps:

1. Navigate to the dashboard page
2. Verify that an error message is displayed indicating invalid access

Expected Result: Error message is displayed indicating invalid access

TC_BT_003: Verify dashboard load with expired session

Preconditions: User's session has expired

Steps:

1. Navigate to the dashboard page
2. Verify that an error message is displayed indicating expired session

Expected Result: Error message is displayed indicating expired session

TC_BT_004: Verify dashboard load with slow network connection

Preconditions: User has a slow network connection

Steps:

1. Navigate to the dashboard page
2. Verify that the dashboard loads slowly or with errors

Expected Result: Dashboard loads slowly or with errors due to slow network connection

TC_BT_005: Verify dashboard load with high traffic

Preconditions: Multiple users are accessing the dashboard simultaneously

Steps:

1. Navigate to the dashboard page
2. Verify that the dashboard loads slowly or with errors due to high

traffic\nExpected Result: Dashboard loads slowly or with errors due to high traffic

Langflow response :

Based on the provided JSON data and the extracted acceptance criteria, here are 5 test cases for the dashboard page:

TC_BT_001: Verify successful dashboard load with valid access

Preconditions: User is logged in with valid access

Steps:

1. Navigate to the dashboard page
2. Verify that relevant data and visualizations are displayed correctly

Expected Result: Dashboard loads successfully and displays relevant data and visualizations

TC_BT_002: Verify dashboard load with invalid access

Preconditions: User is logged in with invalid access

Steps:

1. Navigate to the dashboard page
2. Verify that an error message is displayed indicating invalid access

Expected Result: Error message is displayed indicating invalid access

TC_BT_003: Verify dashboard load with expired session

Preconditions: User's session has expired

Steps:

1. Navigate to the dashboard page
2. Verify that an error message is displayed indicating expired session

Expected Result: Error message is displayed indicating expired session

TC_BT_004: Verify dashboard load with invalid credentials

Preconditions: User enters invalid credentials

Steps:

1. Navigate to the dashboard page
2. Enter invalid credentials
3. Verify that an error message is displayed indicating invalid credentials

Expected Result: Error message is displayed indicating invalid credentials

TC_BT_005: Verify dashboard load with slow network connection

Preconditions: User has a slow network connection

Steps:

1. Navigate to the dashboard page
2. Verify that the dashboard loads slowly or displays an error message

Expected Result: Dashboard loads slowly or displays an error message due to slow network connection
